Welcome

Simultaneous Treatment of the **F**ace, **A**irway and **B**ite

Participants will learn protocols for diagnosis, treatment planning, and treatment of dentofacial deformities. The goals of comprehensive treatment include facial balance, airway enlargement and bite correction. The face, airway, and bite are inextricably linked in facial skeletal diagnosis and treatment planning. **FAB™ represents the simultaneous correction of facial, airway, and bite abnormalities**, and leads to consistently excellent results in terms of function, aesthetics and stability.

This **three-day course** will provide surgeons, orthodontists and dentists with knowledge and tools for improved outcomes and fewer treatment complications.

Price and Registration

ATTENDANCE IS LIMITED. Please confirm your inscription as soon as possible.
